INTRODUCTION

This salary survey has been made for the information and use of State and Federal officials concerned with the grant-in-aid programs. The compilation shows salary ranges in pay plans for selected classes of positions in State and local grant-aided employment security, public welfare, public health, mental health, vocational rehabilitation and civil defense programs. The survey includes all States, the District of Columbia, Puerto Rico, and the Virgin Islands.

The data for the survey were compiled by the regional representatives, Office of State Merit Systems, in each of the regional offices of the Department of Health, Education, and Welfare. The representatives obtained their information from the classification and compensation plans regularly submitted to this Department, to the Department of Labor, and to the Department of Defense as merit system plan materials.

The definitions for the selected classes reflect typical functions and responsibilities as outlined in the appropriate class specifications of the various States. However, any brief definition of this kind cannot reflect all the possible variations in assignment of duties. If the principal duties of a class of position are determined to be substantially the same as those outlined in the corresponding definition, the salary range has been recorded, irrespective of the State's title for the class. If the duties of a position in a particular State are determined not to be substantially within the scope of the definition, salary data for the class in this State have been excluded.

A number of the definitions indicate the customary amount of required background experience by use of the following qualifying statements: "some" experience, "considerable" experience, and "extensive" experience. These are, in general, interpreted as follows: Some experience - less than 2 years; considerable experience - 2 to 5 years; extensive experience - over 5 years.

The statements in the definitions indicating the usual educational requirements are based primarily upon those stated in the class specifications, but may reflect such educational requirements as are maintained as a general practice throughout the total selection process.

Definitions using the term, "This is the entry (beginning) level professional position in the series," should be interpreted as meaning the level of position in which new workers are recruited to fill beginning professional positions, and not the trainee level of position. For the purpose of the survey, a trainee position is one in which the employee (a) is appointed to go on educational leave or (b) has the basic education but does not have the experience required for appointment to the journeyman level, is not expected to perform the level or scope of duties outlined in the "Definition," usually works under close supervision, spends a portion of his time in a formal continuing training program (in contrast to regular orientation and in-service), and is trained for early promotion to the entry level professional class as defined in the "Definition."

Where a position is not the trainee level as defined above, but is a beginning level position where tenure is limited and promotion is automatic at the next higher level, footnote (f) is used.

The decisions on comparable classes were made by the regional merit system representatives after studying the State class specifications, and applying their additional knowledge to State classification plans and organization. Program representatives participated in the development of the definitions and the determination of comparable classes. The comments of State personnel on previous issuances of the survey have also proved valuable.

It should be kept in mind that because of the differences among the States in size and structure of organizations, as well as in programs and in assignment of duties, the data are not precisely comparable from State to State. In addition to differences in duties of related positions among the State and local agencies, there also are differences with respect to job titles, minimum qualifications, and the policies and practices in the administration of pay plans. Only the more significant of these differences have been identified in the footnotes to the tables.

In view of the considerable differences noted above, caution should be exercised in using these salary data, particularly in assuming exact comparisons between positions.

Footnotes (a) through (f), with explanatory statements, are:

- (a) Longevity payments are added to this base pay range.
This footnote indicates that longevity payments may be granted above the recorded maximum salary rate. Cost of living adjustments or other regular supplemental payments are included in the salary range reported.
- (b) Appointments are frequently made above the minimum of this salary range.
If under established policies appointments are always made above the minimum, the induction rate is shown as the minimum of the range.
- (c) Minimum qualifications in this State significantly higher.
- (d) Minimum qualifications in this State significantly lower.
In footnotes (c) and (d), the references to significantly higher and lower qualifications apply where the combination of education and experience is higher or lower than that stated in the definition.
- (e) This range includes the lowest minimum and highest maximum limits used by jurisdictions for this class.
This relates to cases where the class of position is used by several jurisdictions and the salary ranges differ. Where many jurisdictions appoint at rates higher than the recorded minimum, the footnote (b) is also used.
- (f) After a short period (6 months - 1 year) of satisfactory service in this class, the employee is automatically promoted to the next level class which is at a higher pay scale.
This footnote refers to entrance classes of positions from which the incumbent is automatically promoted to a higher level at the end of 6 months or a year.

Remaining footnotes apply to special items applicable to particular States.

For reference purposes, we are listing below the mean minimum and mean maximum salaries for the current period and the past two years.

CHIEF OF BENEFITS

This is responsible administrative and supervisory work involving the direction of the processing of claims and benefit payments. An employee in this class has direct authority over the central office benefit operations, but may have only indirect and very limited authority in regard to local office benefit functions. This class usually requires extensive experience and training in one of the fields of management. College training may be substituted for some of the required experience.

HEARINGS REFEREE

This is responsible work preparing, conducting, and deciding quasi-judicial hearings, involving questions of statutory compliance, claims, assessments, and regulation violations, in issues between State departments and outside parties. Decisions are subject to review of an administrative appellate body or of courts. This class usually requires knowledge of rules of quasi-judicial procedures and evidence, of the jurisdictional rules of procedure of administrative hearing agencies, and of Federal and State employment security statutes. This class usually requires college graduation and responsible experience in labor or industrial relations, public welfare administration, law, or enforcement of Federal or State labor laws, or any equivalent combination of experience and training. Some States require graduation from law school or admission to the bar.

Mean Minimum Salary - 8651

Mean Maximum Salary - 11100

(a) Longevity payments are added to the range.

(c) Minimum qualifications significantly higher than those defined.

(g) Two positions, one in employment service and one in unemployment insurance.

(w) Includes annual Christmas bonus.

*Salary range revised since last semi-annual survey.

No comparable class within scope of definition reported for the following: District of Columbia

UNEMPLOYMENT CLAIMS DEPUTY

This is technical work involving the non-monetary determinations on unemployment insurance claims including the adjudication of questionable or contested claims. An employee in this class may supervise claims clerks in the processing of the more routine claims. A working knowledge of unemployment compensation laws and related labor laws and regulations as well as of labor relations and employment problems is required. This class usually requires graduation from high school and considerable training and experience. College education may be substituted for some experience.

EMPLOYMENT INTERVIEWER

This is the professional entry position in the Interviewer series and involves interviewing applicants for employment or interviewing employers seeking workers through the State employment service offices. The duties may include taking unemployment insurance claims. The work primarily involves determining the work qualifications of applicants and in most instances placing them in suitable employment. A working knowledge of employment service practices, State and Federal employment laws, the Unemployment Compensation Act, Dictionary of Occupational Titles, and occupations in industry and business is needed for satisfactory performance, but may be obtained after appointment. This class usually requires graduation from high school and considerable experience, some of which shall have been in related fields, or graduation from a college.

MEDICAL SOCIAL WORK CONSULTANT

This is responsible professional social work in a State Welfare Department involving participation in the medical care aspects of public assistance programs and/or in the administration of APTD. An employee in this class usually works under general administrative direction. The incumbent assists in the development of policies, procedures, and methods for medical-social aspects of the public assistance programs, and carries responsibility for assuring that these established standards are maintained. The work includes responsibility, as a member of the medical team, for the social work role in reaching decisions with respect to eligibility. The incumbent participates in planned training of social work staff through interpretation of their responsibilities in the medical-social aspects of the public assistance programs. This class nearly always requires training in a graduate school of social work and some supervisory experience in social work with either training or experience in a medical setting.

No comparable class within scope of definition reported for the following: Illinois, New Jersey.

DIRECTOR OF PUBLIC HEALTH STATISTICS

This is responsible technical and supervisory statistical and research work. An employee in this class organizes and directs the public health research and statistical program of the department. The work includes the direction of subordinates; assembling, tabulating, and analyzing statistical data; and the preparation of periodic and special reports with charts and explanatory data. The employee may supervise the vital statistics unit, but this position should not be considered the same as the vital statistics registrar or chief of vital statistics if these latter two positions do not include research. This class usually requires graduation from college with specialization in statistics and extensive experience in progressively responsible research and statistical work, usually in the field of public health.

DIRECTOR OF PUBLIC HEALTH ENGINEERING

This is responsible administrative and technical work in planning and directing the state-wide public health engineering program. An employee in this class has responsibility for coordinating the sanitary engineering program as a part of a general state-wide public health program, and for providing technical engineering advice toward the solution and control of environmental sanitation problems. Supervision is exercised over a staff of engineers, technicians, and related personnel. This class usually requires a BS degree in engineering including undergraduate or graduate training in sanitary engineering, plus at least one year of graduate study leading to a Master of Science degree, or a Master's degree in public health and extensive public health engineering experience.

PUBLIC HEALTH ENGINEER

This is the professional entry position in environmental sanitation work requiring engineering training. Under supervision of an experienced engineer or a health officer, an employee in this class assists in the enforcement of public health laws, regulations, and standards by reviewing designs and installations of facilities and equipment and by means of investigational and educational activities involving the application of sanitary science and engineering skills for the control of communicable diseases and the promotion of health and safety. The incumbent supervises or trains sanitation aides and inspectors engaged in routine inspection and sampling work. This class usually requires no experience but requires a Bachelor's degree in engineering with a major in sanitary, civil, mechanical, or chemical engineering.

HEALTH OFFICER

This is the professional entry position in medical work in the public health field. An employee in this class may work with the director of a division in the central office and is responsible for making field investigations of the factors related to the causes of various communicable diseases. The incumbent evaluates facilities available and recommends techniques to be used to prevent or treat such diseases, and may be in charge of a small local health unit or assist a health officer of higher rank in the administration of a larger local unit. This class requires graduation from an accredited medical school, plus one year's internship, and ability to secure a license to practice medicine in the State. One year of graduate study in public health may also be required.
